Castle Microwave Brings USC Technology to UK and Ireland

FOR IMMEDIATE RELEASE

BURBANK, Ca, USA - July 26, 2017 - Universal Switching Corporation (uswi.com), a leading manufacturer of switching and distribution products, has brought the expertise of Castle Microwave (CastleMicrowave.com) and USC together to sell and market their products in the UK and Ireland serving the satellite, defense, communication, telemetry, ATE and broadcast industries. Founded in 1981, Castle Microwave is one of the UK's foremost suppliers of high technology and leading-edge RF and Microwave products with an extensive remit and expertise covering components and subsystems used in today's state-of-the-art Military, Space, Telecoms, Smart Energy and Test & Measurement markets. The team at Castle Microwave has a clear understanding of requirements and can advise on all facets of design and development from initial inception to final production. Like Universal Switching Corporation, Castle Microwave operates an ISO 9000 quality assurance system certified by the BSI to ISO 9001:2008 (BSI Registration No. RS21649) and holds additional approvals from other trading partners. During discussions, the Castle Microwave team indicated that they are well positioned to support USC and their products in many of the expanding UK marketplaces with their experienced sales team, and excellent engineering staff.

About Universal Switching Corporation (USC)

Universal Switching Corporation (USC) is a privately held corporation in the city of Burbank located in southern California. The company manufactures best-in-class programmable signal switching and distribution products for rugged and industrial applications, government subcontractors, and for industrial or commercial customers in the US and abroad. USC signal switching and distribution products are sold internationally for use in the defense community, communication, telemetry, ATE and broadcast industries. All products are manufactured in Burbank CA and are supported by their ISO-9001-2008 [Quality Management System](#). Since 1992, they have continued to introduce innovative cutting-edge products supported by both domestic and international sales offices.
