## NQA Audits Universal Switching Corporation and Recommends Continued ISO 9001:2008 Certification

Tweet

FOR IMMEDIATE RELEASE

**BURBANK, CA, USA - August 29, 2017** - Universal Switching Corporation ([uswi.com](http://uswi.com)), a global manufacturer of signal switching and distribution products, announced that it was audited by ANAB accredited NQA, USA, and it was recommended for continued certification to ISO 9001:2008. The external audit, performed on-site by one of NQA's most experienced auditors, confirmed what clients and vendors have already come to expect from Universal Switching Corporation: That our products and services are of the utmost quality and will continue to exceed our customers' expectations of performance, delivery, and support.

Of all QMS regimes, the ISO 9000 family of standards is probably the most widely implemented across the global. Mr. Grodin, Quality Manager, indicated that the company originally achieved ISO 9001 nearly 10 years ago and improves every aspect of the company. Universal Switching Corporation's management team fully supports the ISO process and its function within the company. The tremendous teamwork and dedication shown by all "Team USC" employees to the Quality Management System has resulted in continuous re-certification by National Quality Assurance since their QMS process was effected. In an interview, Grodin mentioned that the company is currently implementing updates to their QMS to meet the new ISO 9001:2015 standard by 2018, and to continue improving their excellent Quality Management System.
