Subject: RoHS / REACH Certification

To whom it may concern-

Universal Switching Corporation has reviewed the subject directive (on the restriction of the use of certain hazardous substances in electrical and electronic equipment) and has determined that the products that the company produces are RoHS compliant where one of the following exemptions may apply:

Applicable RoHS exemptions (Directive 2011/65/EU, Annex III, Amendment 2015/863)

- 7(a) Lead in high melting temperature type solders (i.e. lead-based alloys containing 85% by weight or more lead).
- 7(c)-I Electrical and electronic components containing lead in a glass or ceramic other than dielectric ceramic in capacitors, e.g. piezoelectric devices, or in a glass or ceramic matrix compound
- 7(c)-II Lead in dielectric ceramic in capacitors for a rated voltage of 125 V AC or 250 V DC or higher
- 7(c)-IV Lead in PZT based dielectric ceramic materials for capacitors which are part of integrated circuits or discrete semiconductors
- 15 Lead in solders to complete a viable electrical connection between semiconductor die and carrier within integrated Flip Chip packages.

Universal Switching Corporation is committed to monitoring the validity of current exemptions in order to remain RoHS and REACH compliant.
